Prop Replica Building Competition

The Museum of Science Fiction's Prop Replica Building Competition encourages creative thinking within the design and engineering community

The purpose of the competition will be to:

- Reward the talent and creativity that is made possible by imagination and implementation, to creating exceptional prop replicas and other accessories.
- Motivate the next generation of design, build, and engineering professionals to elevate the current state of the art.
- Broaden public awareness of prop design, engineering, and construction as part of a larger goal to increase participation in the arts as a professional career.
- Recognize and celebrate prop design and the technical aspects of the craft.
- Encourage broad participation to learn more about the creative design process, going from imagination to reality.
- Infuse fun, creativity, and innovation into STEAM education at every level.

Registration period is

October 9, 2018 — April 15, 2019 at 5 PM EST

Award recognitions will be made at Escape Velocity on Saturday, May 25, 2019

Students and people from the United States or abroad may participate
